

InLign Tech

Responsibilities:

- Collect, preprocess, and analyze large datasets to derive actionable insights.
- Develop and fine-tune predictive models and machine learning algorithms.
- Conduct exploratory data analysis (EDA) to uncover patterns and trends.
- Create compelling data visualizations and dashboards to present findings effectively.
- Collaborate with cross-functional teams to deliver data-driven solutions.

Requirements:

- Currently enrolled in or a graduate of a program in Data Science, Computer Science, Statistics, or a related field.
- Proficiency in Python or R for data analysis and modeling.
- Familiarity with machine learning libraries such as scikit-learn, TensorFlow, or PyTorch (preferred).
- Experience with data visualization tools (e.g., Tableau, Power BI, or Matplotlib).
- Strong analytical and problem-solving skills.
- Excellent communication and teamwork capabilities.

Benefits:

- Gain practical, hands-on experience in data science projects.
- Receive a Certificate of Internship and a Letter of Recommendation.
- Build a portfolio showcasing your data science models and applications.
